IDEA-3056/66  
Copy 4 of 4

5 December 1966

**MEMORANDUM FOR:** Deputy for Operations, OSA

**SUBJECT :** Mission C216C, Flown on 26 November 1966

1. This mission was planned to cover twenty-three COMOR targets. Twenty-three COMOR targets were covered. A number of other targets were also photographed. Data base coverage was obtained for the first time on one COMOR target-- Chungan Airfield.

2. Several significant intelligence disclosures were acquired by this mission. NPIC readout of COMOR target [ ] disclosed that this suspect coastal defense cruise missile installation is probably nothing more than a coastal defense artillery site. This mission also detected a number of patrol boats at the Santu Naval Base which is located north of the Matsus Islands. Four of the patrol boats observed appear to be KOMAR missile patrol boats.

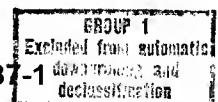

3. Although the mission aborted for technical reasons, it is clear that the mission acquired much more data along that part of the route which was completed than was planned for it. The disclosure of KOMARs at Santu Naval Base was in itself worth the mission. [ ]
